SOFTWARE DEVELOPMENT PORTFOLIO

REACT-Travel-App   https://github.com/adoredior/capstone-project   **Jun 2023**

- Solo Full-Stack Travel React app project. Developed a visually appealing and user-friendly travel app to enable seamless vacation searching and booking. Demonstrate proficiency in a range of technologies, including React, UI design, Axios, Tailwind CSS, React-Router, React-DOM, Node.js, JavaScript, Express.js, and PostgreSQL.

Backend Project   https://github.com/adoredior/Individual-backend-rev-project   **April 2023**

- Solo backend project was designed to create a secure and scalable database structure for storing customer's information and phone bills. Implemented API endpoints for performing CRUD operations on customers' data and bills. Created efficient algorithms to handle data updates, deletions, and additions in the database. Utilized Express.js, Node.js, API, JavaScript, and PostgreSQL to execute backend logic and interact with the database.
